2. General Description

LT2611UXE is a high performance Quad-Port LVDS to HD-DVI2.0 converter.

For LVDS input, LT2611UXE can be configured as 4 Ports and 1/2/4/5 lanes per port. Up to 12dB equalization makes it suitable for long distance application and the maximum data rate is up to 1.5Gbps per lane.

The HD-DVI interface includes 4 TMDS clock/data pairs, DDC, and HPD signal. The HD-DVI transmitter is capable of supporting up to 6Gbps data rate. HD-DVI transmitter incorporates HDCP engines which support both HDCP1.4/2.3.

Two digital audio input interfaces are available, I2S or SPDIF. The I2S interface supports 8-ch LPCM and the SPDIF interface supports 2-ch LPCM or compressed audio, both at maximum 192 KHz sample rate.

The device is capable of automatic operation which is enabled by an integrated microprocessor that uses an embedded SPI flash for firmware storage. System control is also available through the configuration I2C slave interface.

3. Applications

- STB
- DVD/BD
- PTV Box
